Pro-Drain 8

The protection board that creates a neutral pressure zone between the foundation wall and subsoil.

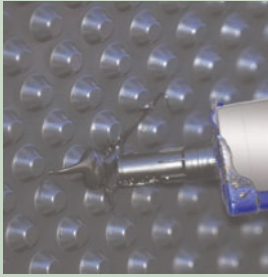

The protection board that creates a neutral pressure zone between the foundation wall waterproofing and subsoil. Can be used as protection for all foundation waterproofing systems and behind timber retaining walls.

Pro-Drain 8

1.2m x 2.1m Sheets

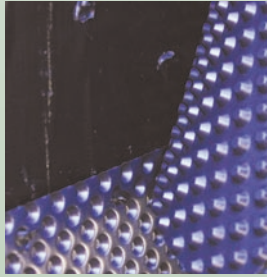

Installation Instruction *(Step by step guide)*

To hold sheets in place, apply adhesive to raised dimples.

Spray Tak Primer can also be used. Check compatibility with substrate.

Place dimples against wall surface. Sheets can be laid horizontally or vertically.

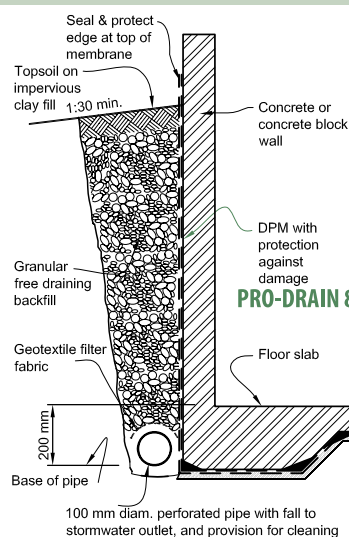

To join sheets apply neutral cure adhesive to dimple holes. Overlap sheets by 2 dimples and press into adhesive.

OPTIONAL: Top edge can be sealed using Tak Primer and Protecto Tape to stop foreign material falling into cavity.
